What's on the Menu

We are dedicated to providing our customers with the highest quality meals for their little ones. We serve only organic, homemade baby food with whole-food ingredients you can trust.

Plus, your child will have the opportunity to try a wide array of flavors bi-weekly, so their palate will be expanded over time!

- **Protein and Healthy Fats:** Our meals are the perfect mix of premium plant-based proteins and fats to help fuel your baby's brain and body development.

We guarantee maximum nutrient absorption with ingredients like Peruvian sachu inchi oil, a superfood found only in South America, and avocado oil, which is loaded with oleic acid.

Further, our delicious pre-made meals are packed with vegetable protein, including superfoods such as chia seeds and white quinoa that are gentle on babies' digestive systems.

- **Handling Picky Eaters:** Kids who are picky about food can be hard to please, but meal prep services make it easier for parents to provide nutritious meals

for their children. With just a few clicks, your kiddo can try exotic vegetables in no time!

Eating can be a real adventure for tiny tots, so it's important to continue introducing new foods—even if acceptance takes up to 15 exposures—to ensure they're getting proper nourishment.

Patience is essential; eventually, your small sprouts will be receptive and willing to try something different. Bon appétit!

Safety and Customization

If you're looking for a safe, non-toxic food packaging option, look no further than something that's FDA-approved and BPA-free—like our proprietary meal prep packs. You don't have to worry about hormone disruptions or any other health concerns caused by unwanted chemicals leaching into your meals if heated.

Now, that's what we call peace of mind!

A parent's dream come true: Raised Real containers not only provide safe storage and heating for your children's meals but also exceed FDA requirements for BPA-free materials.
